

ADVANTAGES OF COMMERCIAL DISPLAYS

Fitness facilities demand Commercial Grade equipment and fixtures with all the latest technologies and features. Upgrade your facilities with Commercial Grade displays from a trusted Leader – LG Electronics. LG offers large 4K displays and Video Walls for group fitness spaces and Commercial Televisions for all other areas of the facility. In addition to TVs, LG Digital Signage serves as a great visual vehicle for gyms and fitness clubs to communicate messaging, branding, class schedules, advertising and much more to their members.

 - Support install company with training and quality check list
 - Provide Calibration training and Firmware updates

MONITOR SIGNAGE

webOS Signage is a web-based platform that powers LG's Smart Signagedisplays and provides the execution environment to host 3rd party applications. The embedded System-on-Chip (SoC) processor allows for much simpler installation and cost reduction by eliminating the need of extracomponents such as an external PC player, while having processing reside inside the display adds another level of control and device management capability for the operator down to the player level.
