Patient Experience Across the Continuum of Care

MDM Healthcare’s innovative Journey PX patient experience solution uses cloud technology configurations to deliver cross continuum patient education and engagement tools. Journey PX can be accessed in the hospital room, clinics, and even follows the patient home on their smart device, email, and patient portal.

prep
Give your patients the boost they need with vital medical education for their journey.

- Important pre-hospital reminders sent to a patient’s personal device.
- Patient education video assignments that prep the patient prior to their procedure.

navigate
Create informational, yet engaging content that helps patients find what they need when they enter the facility.

- Informative and engaging digital signage.
- Wayfinding capabilities that help patients and family members navigate facilities.

my stay
Help your staff manage inpatient care easily, quickly, and effectively.

- Digital whiteboards that integrate seamlessly with other healthcare technology to keep patients and healthcare providers efficiently informed.
- Real-time communication between staff and patient using our proprietary software.
- Personalized inpatient education videos to continue required education and engagement.
- Entertainment: movies on demand, radio – music, relaxation videos.

aftercare
Reduce re-admission and encourage continued patient education.

- Post-inpatient education videos to ensure patient’s health and lower the risk of re-admission.
- Satisfaction assessments which garner powerful insights about the facility and healthcare team.
What Journey PX Does

► Education: provides care teams with the tools to educate patients before and after admission at a facility.
► Integration: allows seamless communication between numerous healthcare technology systems and care team members.
► Information: notifies patients and guests about events and offerings beyond patient education.

Educational Content

► Video format works well for all types of learners and is developed at a 5th grade level or below.
► Closed Caption is available for the hearing impaired.
► Clients can easily upload their own content to the Journey PX solution.
► Over 5,000 videos to choose from.
► Allows for consistent teaching across the healthcare continuum.

Features

► EMR, ADT, single sign on, dietary, and other integrations.
► Two-way communication between the patient and staff.
► Educational videos, on-demand movies, and the ability to upload your own content.
► 24/7/365 remote monitoring.
► On-site training for administrative users, super users, and nurse educators.

Content Storage

► Lowers operational costs
  • Reduces maintenance needs.
  • Decreases the cost of managing in-room computers.
  •Eliminates the need for large servers and racks.
► Eliminates work for your IT department
  • Administrates and supports hardware and software.
  • Manages security and anti-virus protection.
  • Allows for consistent teaching across the healthcare continuum.

The Journey PX solution is cloud based!

Installation & Services

Installation & Warehouse

Installation Services
MDM Healthcare is with you every step of the way from the selection of the optimal mounting solutions to onsite installation. Our national team of installation partners can provide comprehensive project management and installation services to free up time for your resources.

Fully Stocked Warehouse, Rapid Exchange Program
Our dedicated 100,000 square foot warehouse ensures an efficient process from order to shipment to receiving. With 40,000+ LG displays on average in our warehouse, shipping of product to your facility is fast! Our Rapid Exchange Program is designed to guarantee displays shipped from our warehouse arrive to you in pristine condition. Should a unit arrive damaged, a replacement unit will be sent out almost immediately.

Concierge-Level Technical Services

Our seamless project implementation process ensures a quality outcome.

Once we provide consultation on the project scope, our technical services team will create a detailed implementation plan.

We start with an on-site evaluation of the existing infrastructure to determine steps needed to complete the project. Once this is finalized, a detailed installation assessment with our recommendations is provided. When the plan is approved, our dedicated project manager takes over to ensure the project is completed in a timely and satisfactory manner.

After our certified installation team is finished, our support does not stop there. We provide dedicated technical support after installation and offer maintenance and service agreements.
**Patient Engagement Equipment**

### Pillow Speakers

**Curbell Medical**

- Easy to read numeric keypad for direct access to specific TV channels
- New case material—case is three times stronger

**Utility Bin WM-0001-29**
▶ For patient or clinician storage; easily removed for cleaning

**Flip-Down Worksurface OBT-0002-27**
▶ For OBT Rear Column Accessory Track -- 14 x 8" / 35.6 x 20.3 cm
Digital Signage

Digital Whiteboards

The digital whiteboard is an advancement in digital signage technology that is an update to a hospital staple. Updating your facility with MDM Healthcare’s proprietary software is now easier than ever! Read a couple reasons why our technology solution is the best value on the market:

Interoperability
MDM Healthcare’s digital whiteboards use revolutionary software that work well with many EMR systems to deliver fast and accurate information to patients and healthcare providers. Interoperability of all healthcare systems is critical for the purpose of patient safety, consistent communication, and to assist the healthcare team.

Non-disruptive Technology
MDM Healthcare’s digital whiteboards are considered to be non-disruptive, so patients can still enjoy entertainment and educational videos without any interference. These capabilities can make MDM our whiteboards a seamless part of your facility’s current technology.

Great Value
Making the switch from traditional dry-erase whiteboards to digital whiteboards isn’t as expensive as everyone thinks! Since our software works with any smart television, digital monitor, or paper white technology. Our digital whiteboards have proved to be a better value than other technologies on the market.

Elevate Patient Experience
Our digital whiteboard technology can increase patient satisfaction and experience with its’ easy to read type face, accurate information, and customization options. Additionally, the information on the whiteboard will automatically be added to patient’s EMR giving an accurate history of the patients admitted to your facility.
Healthcare AV Collaboration

At MDM Healthcare we have a professional team dedicated to system design, integration, project management, and installation services. Rely on MDM Healthcare to provide the most effective system design to meet your needs for the space whether it be wireless presentation solutions, control solutions, video walls, integrating multiple sources, audio, etc.

Meeting Room Solutions

Interactive Digital Signage

Digital Art Display Content

Welcome
Digital Signage

22" - 65" Digital Signage Display
65" • 55" • 49" • 43" • 32" • 22"
- This Digital Signage Series provides the ability to easily create customized apps using LG’s Software Development Kit. This webOS 3.0 signage has built-in Wi-Fi and SoC* technologies, helping to simplify installation and conveniently manage content.

49" - 98" Digital Signage Display
98" • 86" • 75" • 65" • 55" • 49"
- Supports displaying Ultra HD content as well as a divided content layout to show up to 4 split images on one screen. Its benefit enables you to create various formats of content to deliver commercial message effectively. Also, it is enhanced in content management.

32" - 65" Overlay Touch Series
65" • 55" • 49" • 43" • 32"
- Overlay Touch Series is an attachable touch screen that easily changes standard signage products into touch products. With Overlay Touch, your screen will turn into interactive display which enables smooth writing and drawing experience with 10-point multi-touch function.

130" Digital Signage Display
130"
- The LG 130" All-in-one LED Screen features a 130-inch large screen with no bezel. With superb picture quality powered by HDR10 and immersive Surface Sound, attendees can get more focused and deeply engaged for more productive meetings.
**Video Walls**

49” Video Wall Panel
- Super-narrow bezel
- Wide viewing angle
- Stable panel
- SuperSign W-Lite for content management

55” Video Wall Panel
- Super-narrow bezel
- Wide viewing angle
- Higher brightness uniformity
- SuperSign W-Lite for content management
Our content management solutions enhance the patient’s experience of their in-room hospital TV. Patients can locate and enjoy available television programming, check on the daily weather and review meal schedules - all from the comfort of their room.

Features

Customizable Welcome Screen
Let your patients feel a warm and personal welcome with the function to program customized name greetings.

Informative & Up-to-Date
Provide patients with the power to receive updated information on weather, meal schedules and other television programs right at the comfort of their rooms.

Superb Ease of Management & Maintenance
Easily clone TV settings from a designated master TV to all other TV sets through a USB memory device. With diagnostics that can be stored to the USB device, let service engineers easily troubleshoot, identify and resolve technical issues.
No matter the specifics, MDM Healthcare can create a signage system that ensures customers enjoy appropriate ambiance.

Your organization has invested time and money into growing your brand and your MDM’s Creative Content Creation solution should be no different. This is designed to not only carry your brand inside the walls of your business, but outside as well.

Our Content Creation service is configured and designed to improve your customers’ experience, while not adding more work for your staff and marketing teams.

MDM’s experienced team offers yours the ability to customize the look and feel of your customer interfaces and adds a variety of features that engage, inform, and improve your customer outcomes.

In need of a single asset or a full scale custom content project? We have you covered!

- CONTENT MANAGEMENT SYSTEMS
- CONTENT DESIGN
- DISPLAYS
- VIDEO WALLS
- MEDIA PLAYERS

Danby Healthcare Refrigerator

The newly designed Danby Health under-counter compact refrigerator. Built with medical grade components and loaded with powerful features, Danby Health combines innovative technology, energy efficiency, and proven reliability demanded by Medical, Laboratory and Clinical facilities.

Danby Health Key Features

- Temperature Stability engineered to maintain a steady range 2 - 8 degrees centigrade
- Internal Forced-Air Fan ensures even cooling from top to bottom
- External Digital Display makes it easy to monitor the internal refrigerator temperature
- External Digital Thermostat permits precise temperature management without opening the door
- High/Low Alarm sounds alert if temperature rises or falls out of the set range
- Integrated Temperature Logger internally stores refrigerator readings for a simple and reliable solution to temperature monitoring
- USB Port built in for downloading stored temperature data
- Healthy Handle innovates a unique Danby Health approach to controlling HAI's using CuVerro bactericidal copper alloy
- Keyed Door Lock adds another layer to material security
- Flat Door Liner conforms to guidelines contributing to stable conditions for medical products
- Hospital grade “Green Dot” power cord
- 2 full and 1 half width wire shelves promotes free air flow
- Interior LED lighting
RF Distribution System

MDM eliminates the confusion in distribution of off-air (local) TV signals and DSS satellite signals (cable) throughout your hospital or healthcare facility. Experts in television system technology and installation, MDM's staff works with you to evaluate your current system, assess the capabilities of your operations, and determine the requirements needed to meet both present and future needs.

We custom design and build or redesign and upgrade your RF Distribution system to meet your hospital or long-term care facility’s needs. No system is too large or too small for MDM's experienced engineering team.
What is a **Z-Band** Television Distribution System?

Z-Band manufactures and sells an “electronic box” and a companion device which together make up Z-Band’s state-of-the-art, RF Video Distribution System. The System is composed of an active video hub, the “GigaBUD” and a remotely powered balun, the “GigaBOB”. The two units work in conjunction with one another to amplify, split, and condition the RF signal from a satellite, cable TV provider, or internally generated video source and distributes the signal to televisions, video walls or monitors.

Unlike an IPTV system, the Z-Band RF Video Distribution System is not incorporated into the enterprise’s server/switch and because it passes an RF signal, the system does not impact the network bandwidth in a facility. The TV signals are distributed on a Category 5e or better cabling infrastructure that adheres to the “568” international wiring standard.

**The Value of Z-Band**

- Network cable is less expensive per foot than coax
- Equipment utilizes rack space instead of wall space – no more plywood backboards
- Only two pieces of Z-Band equipment are needed; a video hub and a balun
- Only one signal level to set and monitor – no more RF engineering support
- Less time spent on installing TVs – no more taps and splits with coax. It is all done electronically from the technology closet
- Adding additional TVs is simple – plugging a cat jumper cable from the video hub to a patch panel and adding a balun at the new TV location
- No more intermediate technology to monitor and replace
- Built in fiber receiver option saves 1 U of rack space when utilizing a fiberbackbone
- Eliminates the need to keep balancing the distribution amplifiers
Head End & DirecTV®

HIGH-DEFINITION

MDM's modular digital headend system is designed to bring your facility the advantages of high-definition, small-dish DSS programming. Each system is custom-engineered to your needs, tested, and shipped fully assembled to make installation quick and easy. Included are all racks, receivers, antenna, modulators, splitters, and combiners required to produce proper RF output levels.

DSS DIGITAL HEADEND

- Each channel has an individual receiver and modulator
- All components are rack-mounted and shipped ready to connect to MATV system
- Frequency agile modulators allow easy change in channel lineups
- Local maintenance available
- Headend can be leased or purchased

Rapid Exchange Program

Making Exchanges Simple

When your TV shows up damaged, it can certainly be frustrating. What’s the solution? Luckily, replacing it is an easy, no-hassle process with MDM Healthcare's Rapid Exchange Program for LG Healthcare and Commercial-Grade televisions. No tedious paperwork to complete, just snap a photo of the damage to your unpacked TV along with serial number and send it to us within six months from delivery!

And if your TV experiences technical difficulties within 30 days from delivery, exchange it! After a brief phone troubleshooting process, if we cannot resolve the issue, send it back to us for a no-cost exchange.

Just Follow This Easy 3-Step Process!

1. Contact MDM Healthcare Customer Service at customerservice@mdmcommercial.com or 800.359.6741 to notify us of the damaged item(s). You will then receive an email from MDM Customer Service with instructions.

2. Take clear photos of the damage to the TV and serial number.

3. Reply to the MDM Customer Service email with the photos and shipping address.

And that's it! Once those steps are complete, you will promptly receive your replacement item(s), no questions asked!

* LG Commercial televisions only. Digital signage is not covered under this program. If equipment arrives damaged, it must be reported prior to installation to be eligible for this program. Program offer to any order shipped after 2/1/19. MDM Healthcare shipping must be used. Program does not cover orders shipped via third party. This program is subject to change. MDM Healthcare has the right to terminate this program at any time. © Copyright 2020 MDM Healthcare. All Rights Reserved.
